FOR IMMEDIATE RELEASE

CIT Relay & Switch JC Series Bi-Colored Illuminated Pushbutton Switch

Maple Grove, Minnesota – The JC Series addition to the broad line of switch product offered by CIT Relay & Switch offers rectangle, square, and sculptured cap options with custom legends available on the diffuser lens. This momentary 24VDC rated switch is available in both SPDT and DPDT featuring 100 milliamp gold or 500 milliamp silver contacts. Bi-colored LED options are available in blue, green, red, and yellow combinations. Single color LEDs are 3 segment and bi-colored include six segments which provides uniform lighting, eliminating unsightly hot spots. The internal snap-action mechanism provides long lasting, quick make and break contacts, tactile detent, and audible feedback features. Epoxy sealed terminals block out flux and other contaminates. Less than ½ inch behind the panel makes this switch ideal for applications requiring compact distance between the PC board and panel. The CIT JC Series versatility makes this switch great for use in test equipment, telecommunications, medical, and audio equipment. CIT Relay & Switch is a leader in offering a broad line of illuminated switch product. Lead-time averages 5 to 6 weeks. Pricing is dependent upon contact arrangement

CIT Relay & Switch, a division of Circuit Interruption Technology, Inc., manufactures a broad array of automotive, telecom, security, industrial and audio relays and switches in thru-hole, panel, and surface mount styles. CIT Relay & Switch products are supported by a worldwide network of distributors and sales representatives who provide sales, service and delivery.
